

QUICKSTART – Universal Refinement Template

Get from idea to shipped in 5 steps. Under 15 minutes.

The Loop

OBJECT → STATE → FRICTION → MOTION → REFINEMENT → (repeat)

Step 1: OBJECT (2 min)

- Name the thing in one sentence
- Name who it's for
- Name what it does

If you can't name it in one sentence, it's too big. Cut it in half.

Step 2: STATE (2 min)

- List assets you already have
- List constraints
- Note time available

You have more than you think. Write it down.

Step 3: FRICTION (2 min)

- Name what blocks motion
- Ask: is this real or imagined?
- Find the smallest version of the block

Most blocks are imagined. The smallest version is usually trivial.

Step 4: MOTION (5 min)

- Write the next executable action
- Timebox it
- Define "done"

Not the plan. Not the strategy. The NEXT action.

Step 5: REFINEMENT (2 min)

- Execute the action
- Note what worked
- Note what didn't
- Set the next OBJECT

This is where you get smarter. Don't skip it.

Rules

1. **One artifact per day.** Blog post, product update, email, script, page.
 2. **Price between \$5–\$19.** Small enough to impulse-buy. Big enough to value.
 3. **Publish to Gumroad.** Or your platform of choice. But PUBLISH.
 4. **Timebox everything.** If it's not done in the timebox, ship what you have.
 5. **No zero days.** Even 15 minutes of motion counts.
-

Example Objects

Day	OBJECT	Timebox	Platform
Mon	Write a blog post about your stack	45 min	Blog + Discord
Tue	Package a Notion template	60 min	Gumroad (\$7)

Day	OBJECT	Timebox	Platform
Wed	Record a 5-min Loom demo	30 min	Twitter/X
Thu	Write a "how I built X" thread	45 min	LinkedIn
Fri	Ship a micro-product	60 min	Gumroad (\$9)

15 minutes. 5 steps. 1 thing shipped. Repeat.
